

VACUUM TRANSFER SYSTEM

NOTE!
FITTINGS AND HARDWARE AS SHOWN ARE SCH 80
PVC AND ARE SUPPLIED BY NEPTUNE BENSON

NOTE: Your Defender® Filter and most of its accessories are acceptable for unprotected installations exposed to the elements. The vacuum transfer system and the compressor require supplementary covers to protect these units from the elements if installed in an unenclosed environment. Neptune Benson recommends a minimum enclosure of an open shelter with a roof to provide protection from direct exposure to rain and snow.
